

MOHD TAUFIQ

Full Stack Developer - CSE Final Year

+91-93106 19583 taufiq31878@gmail.com [LinkedIn](#) [GitHub](#) [LeetCode](#) [PortFolio](#)

Professional Summary

Developer working on building problem Solving Applications using modern technology. I have hands-on experience in building applications, and love to explore new technologies regarding my field of work.

Education

B.Tech in Computer Science

Noida International University, Greater Noida

Aug 2023 – Jun 2027

CGPA: 7.67 / 10

Experience

Post LLM Training Intern

Ethara AI

April 2026 – May 2026

Gurgaon, Haryana

- Evaluated 500+ multimodal model outputs for instruction-following, spatial reasoning, and semantic accuracy to support scalable dataset pipelines.
- Identified and documented model failure patterns including object consistency, style matching, and compositional errors, to drive iterative model improvements.

Projects

JSON WebToken Auth | NodeJs, MongoDB, Bcrypt, React [GitHub](#)

Mar 2026

- Engineered a full-stack JWT authentication system with email verification, forgot/reset password flows, and httpOnly cookie-based session management using Node.js, Express, and MongoDB.
- Implemented secure token handling with JWT secrets, cookie security flags (httpOnly, sameSite, secure), and protected route middleware to prevent unauthorized API access.
- Built a React + Vite frontend with Zustand for global auth state management, integrated Gmail SMTP for transactional emails, and configured production builds served directly via Express.

Stream Chats — Mehfil | MongoDB, Express, React, NodeJs [GitHub](#) | [Live Preview](#) May 2025 – Jun 2025

- Built a full-stack real-time communication platform using MERN stack, integrating Stream Chat and Video SDK to support public/private channels, direct messaging, and HD video calls with scalable channel sync.
- Architected a monorepo with a decoupled Express backend and React 19 + Vite frontend, implementing Clerk-based auth middleware, server-issued Stream tokens, and TanStack Query for efficient data fetching.
- Integrated Inngest for event-driven background jobs (auto-joining new users to public channels on signup) and Sentry for production error monitoring, deploying both services independently on Vercel.

Skills

CS Fundamentals : Data Structures & Algorithms, DBMS, Object-Oriented-Programming, Operating System, Computer Networks

Language : C++, JavaScript, Python

Libraries & Tools : NodeJs, ReactJs, Git, Github, PostMan, MySql, VsCode, n8n automation

Certifications

- **Full Stack Development — GeeksForGeeks** | [Show Credential](#) **July 2025**
Learned full-stack development using React, Node.js, Express, and MongoDB for scalable web apps and REST APIs.
- **Python for DataScience — IBM Developer SKill** | [Show Credential](#) **May 2026**
Completed IBM Python for Data Science certification — covering NumPy, Pandas, Matplotlib, and data analysis workflows.

Achievements

100+ LeetCode Questions Solved

CodeFest 2k25 — Secured Top 3 among 40+ competing teams.
